

San Joaquin General Hospital Emergency Management Program

Charla Barney RN, BSN

Staff Nurse V

Emergency Management Program Coordinator/ Paramedic Nurse Liaison

Objectives

Provide an Overview

Provide an overview of our Emergency Operations Plan (EOP)

Provide

Provide a brief introduction to the Hospital Incident Command System (HICS)

Review

Review SJGH's internal codes

Describe

Describe the role you as employees will play in a hospital emergency

Why is this important for you to know...

Every employee here at San Joaquin General Hospital will play a role in responding to an emergency

It may be a drill, a routine emergency or an actual disaster

Depending on the situation you may also have the responsibility to be part of the Hospital Incident Command System

Life is unpredictable... THINGS HAPPEN!

The CrowdStrike logo, featuring a white bird-like icon above the word "CROWDSTRIKE" in white capital letters on a red background.

CROWDSTRIKE

A screenshot of the Spirit app interface on a smartphone. The screen shows a message: "Travel Advisory: Our Reservation System has been impacted by a Third Party Vendor Outage beyond our control. Please continue to check back for updates. We Apologize for any inconvenience this may cause." Below the message are buttons for "HOTEL", "CAR", and "CRUISE".

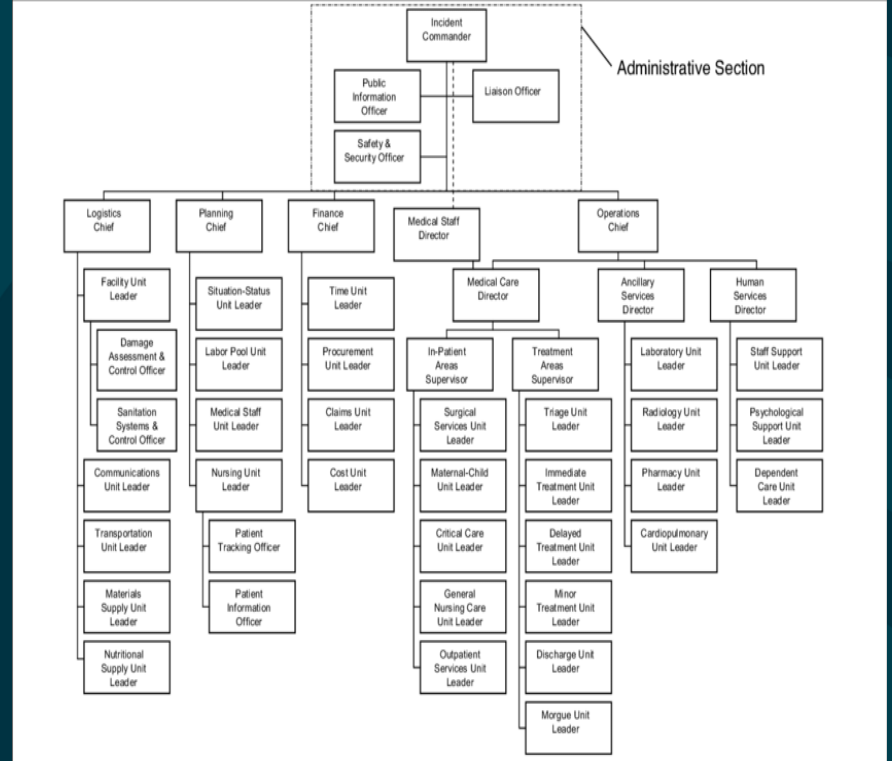

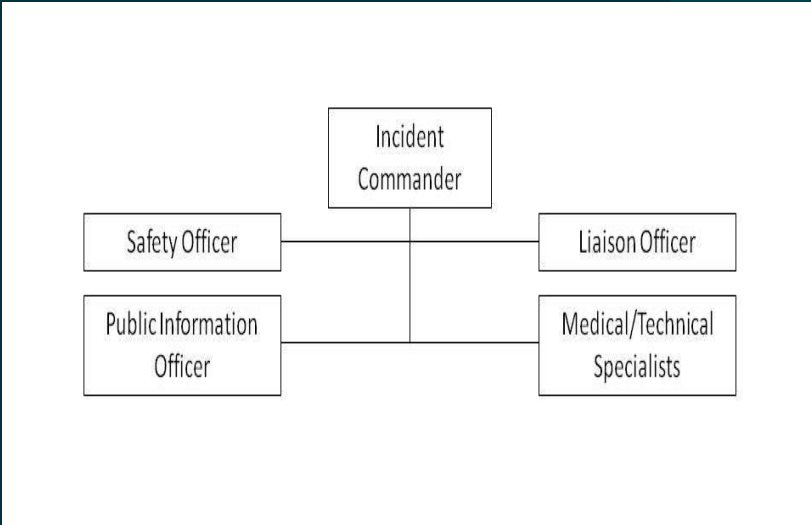

Code Triage Emergency Management Plan Activation

- This can be internal or external in which San Joaquin General Hospital will be impacted in some way.
- “CODE TRIAGE” will be paged overhead three times in succession every five minutes.
- Command post activated, staff positions assigned.
- Staff callback initiated.
- Callback staff reports to command post.
- Job action sheets distributed.
- HICS

Hospital Incident Command System

WHAT DO WE DO TO STAY PREPARED?

**Hazard Vulnerability
Analysis**

**Emergency Operations
Plan**

**Emergency Operations
and Exercises**

**Evaluate our exercises
to continually update or
revise plans**

Internal Hospital Codes

- The best way to familiarize yourself with the internal codes AND activations is the Emergency Preparedness Flipchart
- If you are ever the one to come across a situation requiring additional staff/resources, call:

#99

The operator will answer **#99** immediately and you will tell them; your name, location, and the type of emergency.

Rapid Response Team

- The Rapid Response Team (RRT) responds to adult/adolescent medical emergencies within the hospital and buildings connected to the hospital, 24 hours/day.
- The Rapid Response Team provides clinical assistance and support in the care of an individual whose condition may be deteriorating, but who has not experienced, or is not believed to be in imminent danger of a cardiopulmonary arrest.
- Team members support patient care within their specific scopes of practice, functioning under approved standardized procedures.
- An ICU nurse responds to calls within the hospital. A nurse from the Emergency Department responds to calls within the Ambulatory Care Clinics, Cafeteria, Laboratory, and Bus stop.

Rapid Response Procedure

Any staff member may activate the team when rapid assessment and intervention is deemed necessary for a declining patient.

A patient, family member, or visitor can activate a rapid response alert by using the staff assist button located inside the room or escalating concerns to the nursing staff on the unit.

Signs posted in each room outline the process of escalation to patients, families, and visitors.

The response is activated by calling #99 and informing the operator of the need for the RRT and providing the location of the patient.

Who is on the Rapid Response Team?

An ACLS
trained ICU or
ED Nurse

A Respiratory
Therapist

Patient's assigned
nurse or nurse in
charge of
patient's location

The House
Supervisor

Rapid Response BOA

- Any patient that has delivered an infant outside of a sterile environment.
- Additional team members for BOA:
 - Labor Delivery Recovery Postpartum RN
 - NICU RN
 - ED RN
 - Respiratory Therapist
 - Patient's assigned nurse or nurse in charge of the patient's location (such as a clinic)
 - The House Supervisor will also physically respond if possible but may obtain a summary by telephone if necessary

Rapid Response TNKase

(inpatients only)

All inpatients identified as having an Acute Ischemic Stroke (AIS) and are deemed to be a candidate for receiving Tenecteplase (TNKase) will have a Rapid Response TNKase Alert initiated.

Additional team members for TNKase:

- a. PG I, PG II, and PG III
- b. ICU RNs assigned to be Code Blue Responders
- c. Patient's assigned nurse
- d. Pharmacist (when available)

Rapid Response White

Rapid Response WHITE will be activated for children and adolescents under 14 years of age.

Team members:

a) ED RN

b) Respiratory Therapist

c) Patient's assigned nurse or nurse in charge of the patient's location (such as a clinic)

d) The House Supervisor will also physically respond if possible but may obtain a summary by telephone if necessary

SAN JOAQUIN GENERAL HOSPITAL DOES NOT HAVE A PEDIATRIC UNIT

CODE RED
